

On Monday April 29, Dave O'Mara Contractor will begin the City of Columbus' Crack Sealing project. Crack sealing consists of cleaning, preparing and sealing pavement joints and random pavement cracks on selected streets throughout the city. Sealing cracks in city streets increases pavement life, allowing a longer time between more intense street maintenance, therefore saving money. Weather permitting, the crack sealing project is expected to be complete by the end of May. Below is the list of streets, in order, scheduled for crack seal. Please plan alternate routes whenever possible. Exercise caution in these work areas and obey flagman.

Location	From	To
Stonebridge	Eastlake Woods	Terminus
Marr Road	McKinley Avenue	16 th Street
